T&M Vertrieb OHG

Founded in 2005 we are your reliable and competent partner for all questions concerning laboratory sample storage.

No matter what type of samples you need to store in your refrigerator, upright or chest freezer, we will help you find the perfect solution for sample storage.

In our production plant in Alt-Mölln (a city in northern Germany, not far from Hamburg and Lübeck), we manufacture stainless steel sample storage systems according to the highest quality standards. Whether you need chest or horizontal racks, shelf drawers, cardboard or polypropylene storage boxes: Most of our products can be delivered within 1 to 2 weeks, some are even immediately available from stock. Thus we can always guarantee a very short delivery period.

On the following pages you will find an overview of our product range. If you aren't able to find the required rack in our catalogue, please contact us.

We also manufacture custom racks and boxes at a reasonable price and deliver them promptly.

We will be pleased to advise you.

Best regards

Kay Thierfeldt

Tobias Mahn

1. Storage boxes and grid dividers (Cardboard)

Our storage boxes

are made of waterproof and low-temperature resistant cardboard. Each box is available in two different designs:

- standard version
- coated version

In comparison to the standard boxes, the coated versions are additionally covered with water-repellent plastic.

The cardboard boxes have the following outer dimensions (lid):

Type A storage boxes = 136 x 136 mm
Type B storage boxes = 133 x 133 mm

Both types are available in different heights and with dividers. You will find a variety of matching cardboard dividers on the following pages.

Type C boxes

are designed for the storage of 15ml or 50ml tubes and already include a fitting grid divider .

All storage boxes are available in 5 different colors:

white (W) blue (B) yellow (Y) green (G) red (R)

Custom boxes

are everyday business for us. Both cardboard storage boxes and grid dividers can be made per your special request. Please contact us and we will send you our quotation.

Structure of Item numbers (example: KA501-W)

K = product group (K=boxes)
 A = type of box (here: A = 136x136mm)
 50 = inner height of box (here 50mm)
 1 = version (1 = standard / 2 = coated)
 W = color (w = white)

Structure of Item numbers (example: RB81-30)

R = product group (R = dividers)
 B = type of box (here: B = 133x133mm)
 81 = number of compartments in grid divider (here: 9x9 = 81)
 30 = height of grid divider

1.8. Type KM storage boxes

These cardboard boxes have an outer dimension of 140x140x53mm and are a little bigger than the standard type A box. A 10x10 grid divider is already included. This box is also available as a long version with an outer dimension of 140x276 x53mm, including a 10x20 divider. Thus this box is perfectly suitable for storing 200 (cryo) tubes of up to 2ml.

1.9 Type P storage boxes – made of polypropylene (PP) 133 x 133 x 53mm

These storage boxes have a fixed 9x9 compartment grid divider and hold 81 tubes with a diameter of 12.5 mm and a height of up to 50 mm. They are made of polypropylene and are suitable for a temperature range from -90°C (deep freezer) up to +121°C (autoclave). Available with a standard lid or numeric coding (1-81) on the lid.

Our new insertion plate with numeric coding 1-81

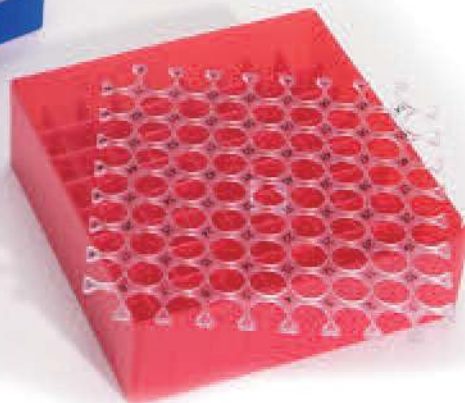

The insertion plate enables clear identification of the sample tube even when the box is completely filled and no lid is used. This polycarbonate plate is just placed inside the box and simplifies your work.

2. Vertical racks (for chest freezers)

With our light but stable stainless steel storage systems, you can perfectly equip your refrigerator or freezer and thus have a clear structure for storing a variety of samples.

Vertical racks

For sample storage in chest freezers we offer you our vertical racks. They come with a folding handle on the top and, if requested, they are also available with an additional locking edge or rod.

Custom racks

can be delivered fast and at a competitive price. Should you be looking for a storage system that is not in our catalogue, please send us your enquiry. Please include the outer dimensions of the boxes you need to store and the model of the freezer you use. We will contact you and send our quotation promptly.

Identification

To simplify finding a rack inside the chest freezer, we offer low-cost numeric rack labelling. The numbering is laser cut into a small stainless steel plate (50x40mm). The lasered numbering is still easily visible, in contrast to an engraved or a sticker number, when the racks are old and well-used.

If you need help finding the perfect vertical rack, please contact us. We will be pleased to help.

Structure of Item numbers

(example TA5011)

- T = product group (T = vertical racks)
- B = box type (here: B = 133x133mm)
- 50 = inner height of box (here: 50mm)
- 11 = number of compartments (above each other)

Equipment suggestions

You will find further equipment suggestions on our website www.freezerracks.eu. Click on "freezer equipment." This overview is frequently expanded.

3. Horizontal racks (for upright freezers, side opening)

No matter what brand or model freezer you own:

With our light but stable stainless steel horizontal racks you can equip it perfectly and easily store and clearly organize a large number of samples.

Our horizontal racks load from the side and have a horizontal folding handle at the front for easy removal from the freezer.

You will find a variety of the most popular freezer racks on the following pages. Additional sizes are available on request.

Freezer racks are manufactured to fit specific storage boxes. Therefore, you will find racks for type A (136x136mm), type B (133x133 mm), and type C boxes, as well as microtiter plates (86x128x18 mm), DeepWell plates or any other kind of customized requirements.

We also offer racks without shelves to store boxes of different heights (page 23). As an alternative, we recommend our upright stainless steel bins for storing a large variety of samples. Please find additional information on page 24.

Custom racks

Please contact us if you need racks of any other dimensions. We will be pleased to send you our quotation.

Identification

To simplify finding a rack inside your upright freezer, we offer low-cost numeric rack labelling. The numbering is laser cut into a small stainless steel plate (50x40mm). The lasered numbering is still easily visible, in contrast to an engraved or a sticker number, when the racks are old and well-used.

The stainless steel plate is spot welded on the front of the rack.

Numbering from 1-99 is available.
(Other labelling at extra charge.)

6	6	GM1866	139 x 544 x 334
6	7	GM1867	139 x 544 x 389

Note:

Each compartment of this rack stores either one DeepWell plate up to a height of 54mm or three microtiter plates up to a height of 18mm.

3.4 Horizontal racks without intermediate shelves

Horizontal racks without shelves are suitable for keeping storage boxes of different heights. The front and bottom are reinforced to increase the stability of these racks.

Box height (mm)	Compartments		Horizontal racks without intermediate shelves – type A boxes (136 x 136 mm)		
	Depth	Height	Item no.	Dimensions in mm (WxDxH)	
50	3	5	GA5035-OZ	142 x 426 x 279	
	3	6	GA5036-OZ	142 x 426 x 334	
	4	4	GA5044-OZ	142 x 426 x 263	
	4	5	GA5045-OZ	142 x 565 x 279	
	4	6	GA5046-OZ	142 x 565 x 334	

Each horizontal rack is available without intermediate shelves. Please add an “-OZ” to the standard item number (e.g. GA5044-OZ).

If you need racks with shelves of various heights to store boxes of different sizes, please contact us directly.

3.5 Bins for upright freezers

Bins have closed sides (lid available upon request) and thus enable storing various samples. Upon request you can also order them in sizes not listed here. Just contact us.

All bins have an extra gripping edge on the front to remove them from the refrigerator or freezer more easily.

Item number	Bins for upright freezers

For further sample setups for other refrigerators & freezers please visit: www.freezerracks.eu

4. Horizontal racks (for upright freezers, single drawers)

No matter what make or model of freezer and what kind of storage boxes you use – our stainless steel racks with drawers are perfect for storing and clearly organizing a large number of samples.

Our high quality racks with drawers simplify your work. The samples are clearly arranged in the refrigerator or freezer and are always easily reachable because drawers can be individually opened.

In contrast to horizontal racks, which are loaded from the side and thus have to be completely removed, the drawers can be opened separately to access a specific box. The drawers have a gripping edge on the front, which can be used even wearing special gloves. The bottoms of the drawers are closed to store small boxes or sample containers too. We can also provide you with drawers with a folding handle or an opening in the bottom. Please contact us to receive a particular quotation.

To avoid pulling a drawer out all the way unintentionally, you can order the drawer racks with a pull-out stop at no extra cost.

You will find an overview of the most popular drawer racks on the following pages. Additional sizes are available upon request.

Our drawer racks are manufactured to fit specific storage boxes.

Therefore, you will find racks for type A (136x136mm), type B (133x133 mm), type C boxes, as well as microtiter plates (86x128x18 mm), DeepWell plates, or any other kind of customized requirements.

Custom racks

If you need a particular rack, please send us your request. We will be pleased to send you a quotation.

Identification

To simplify finding a drawer rack inside your freezer, we offer low-cost numeric rack labelling at little extra expense. The numbering is laser cut into a small stainless steel plate (50x40mm). The lasered numbering is still easily visible, in contrast to an engraved or a sticker number, when the racks are old and well-used.

The stainless steel plate is spot welded on the front of the one or more drawers in the rack.

Numbering from 1-99 is available. (Other labelling at extra charge.)

4.5 Racks with double drawers for type A boxes

If you need more space...

Drawer racks for cardboard type A boxes (136x136mm) are wider than drawer racks for cardboard type B boxes (133x133 mm). Therefore sometimes the freezer is not wide enough to store the same amount of type A boxes as B boxes. We designed double drawers to enable storage of the same amount of boxes.

You can use these double drawers to equip the SANYO MDF-U74V. Only 5 "normal" drawer racks for B boxes fit in this freezer, but 6 racks for B boxes fit into each compartment. By using double drawers, the same amount of A boxes and B boxes can be stored. For this setup, you place 3 double drawer racks next to each other in each compartment of the freezer.

In each double drawer, you can place 2 rows of drawers. Thus the SA5045-2 provides space for 40 type A boxes (5 drawers each holding 2x4 boxes). These double drawers naturally also have the handy gripping edge, so that you can easily open them individually even when wearing gloves.

Box height (mm)	Compartment		Drawer racks WITHOUT pull-out stop

5. Custom racks

On these pages we would like to show you examples of custom racks that we manufactured according to customers' requests. If you are also looking for a special kind of storage system, please contact us.

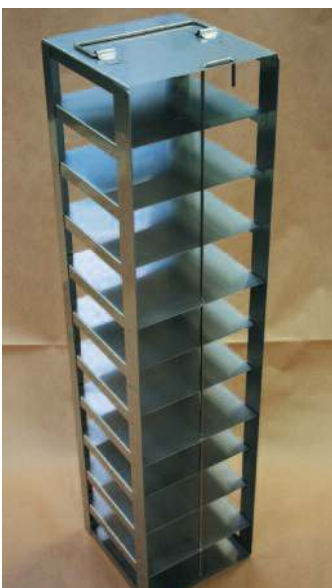

Vertical rack with locking rod for storage of microtiter plates

This vertical rack has 4 drawers that can be opened without falling or being taken out of the rack as requested by our customer.

Rack with drawers. Closed on all sides, lockable front lid.

Vertical rack with a safety rod for storage of type A boxes (boxes cannot fall out).

Vertical rack for storage of matrix boxes or DeepWell plates in a chest freezer.

Rack for vertical storage of plasma bags in a chest freezer.

This horizontal rack has 3 shelves which are height-adjustable. This way either 16 boxes type B/P 50mm high or 12 boxes 75mm high can be stored.

Horizontal rack for storage of specimen holder boxes.

A stainless steel box equipped with a grid divider for storage of cryo tubes in liquid nitrogen.

This horizontal drawer is open on one side, so the boxes can be taken out sideways. Additionally, the drawers have small dividers to prevent the boxes from sliding.

This horizontal rack has dividers in each drawer so that 10 specimen holders can be stored in each compartment. Additionally each drawer has numeric labelling. This ensures clear organization of drawers when several are removed at the same time.

In these horizontal racks for storage of 2ml cryo tubes, the tubes are stored directly in the drawer placed in the attached grid divider – per to the customer's request, each drawer holds 3 tubes next to each other. The numbering given on the front side of the drawers ensures clear organization.

Freezer racks for sample storage
